

»ARCHER«

Far from the Megapolis, beyond the shade of the forgiving palms, the lone Archer shoots. An Emirati adventure awaits with big wins of up to x10,000 to be bullseye'd in OneTouch's latest scorching crash game, **Archer**.

Players can pull from the quiver a quantity of betting options and side bets to keep their eyes on the arrow head with every single betting round.

Multiple betting zones, with 50 and 100% Cash Out options mean players can laser focus their betting strategy to leave their bets active in the places they're likely to hit big for added exhilaration.

Question is... will they cash out in time for the arrow to strike the backboard?

Lucky Shot!

Players can bet on the part of the target the arrow will hit for even more outside action in the Lucky Shot side bet. Will it hit the outer white, the inner red or blue, or will luck strike and hit the innermost golden bullseye – unless the arrow veers off course, rewarding those who saw it coming? Each one has a multiplier randomly applied at the beginning of each betting round with multipliers ranging from 2x all the way up to 100x!

Under the behemoth Arabian sun, big wins are waiting to be won.

Draw your arrows and shoot for the rewards of the golden sand dunes of OneTouch's Archer.
