

Dive into the deep blue kingdom of **Ancient Triton**, where oceanic treasures await those brave enough to explore the seafloor.

Guided by the mighty king of the sea himself, this underwater adventure uses an exciting "Pay Anywhere" mechanic, simply land 8 or more matching symbols, like golden crowns, tridents, or sunken anchors, anywhere on the grid to score a win. Each win triggers a cascade, sweeping away the winning symbols so new ones can drop down to create a wave of continuous payouts. Keep an eye out for sunken treasure chests acting as **Multiplier Symbols** (ranging from x2 to x10); at the end of a tumbling sequence, all visible multipliers are added together to massively boost your total catch.

The ocean's most valuable secrets are locked inside the glowing pearl **Bonus Symbols**. Discovering 4 or 5 of these rare pearls will plunge you into the **Gold Relic Spins**, awarding 10 or 15 free spins where your collected multipliers become persistent, riding the current to grow larger throughout the entire round. For the ultimate deep-sea divers, uncovering 6 pearls unlocks the legendary **Mega Gold Relic Spins**. In this elite feature, your persistent multipliers don't just add together—they multiply by each other, creating a tidal wave of potential that can reach the game's colossal **10,000x** maximum win. You can even catch 5 extra spins in either bonus mode by finding 3 or more pearls while the feature is active.

Plunge into the depths and let the ruler of the waves guide you to untold riches. With cascading wins, explosive multiplier chests, and the chance to unlock the phenomenally powerful Mega Gold Relic Spins, every drop into the aquatic abyss holds the promise of legendary rewards. Will you be the one to claim the underwater crown and surface with a massive payout?

ANCIENT TRITON
